Art Unit: 2834

Claims 1-26 are rejected under 35 USC 112 as based on an inadequate disclosure for the specific reasons set forth in the previous office action. Please note in Fig. 1, the arrow at the tip of beam #14 shows the beam as bending (rotating) to produce the X-axis motion while Fig. 2 shows #14 as constrained from bending and moving in the X-axis direction via an expansion (or contraction) mode. These are two completely different modes of operation. Thus the conflict in disclosure. Does applicants device operate on the expansion mode (as per fig. 2) or the bending mode (as per fig. 1) that is the unresolved question.

Because the prior art does not show perpendicular or parallel actuators in the same plane contacting opposite sides of an object the claims would be allowable if the 35 USC 112 disclosure problems can be resolved.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
